OPEX EXECUTIVE WORKSHOP & SUMMIT 2026

The End of *~~Manual~~*

CONNECTED ● CONTINUOUS ● EVIDENCED

AI, connected systems and the future of financial reporting and compliance.

SPONSORS

Opex Consulting Ltd | RegTech365 | CertifyHub

Wednesday, 21 October 2026
The Wheatbaker, Ikoyi, Lagos

8:30am Finance Executive Workshop
12:00 noon C-Level Technical Summit

THE HOST

Musibau Lasisi

MD / CEO
OPEX CONSULTING LTD

"Today gives finance leaders and technology leaders an agenda each, built for decisions. Ask the hard questions. Leave with one clear action."

A CONVERSATION WITH THE HOST

Why the end of manual? *Why now?*

Spreadsheets, email chains and disconnected systems carried reporting and compliance this far. Regulators, boards and investors now expect numbers they can trace and evidence they can show.

1. Why "The End of Manual"?

A significant portion of financial reporting, risk management and compliance still depends on manual processes and systems that do not connect. That affects the timeliness and consistency of what institutions produce, and the quality of the information that reaches regulators.

2. Is this about replacing people with machines?

No. It is not a proposition that human judgment or regulatory oversight is becoming unnecessary. It is a recognition that the manual operating model for compliance, risk and regulatory evidence is becoming difficult to sustain.

3. Why bring regulators, finance and technology leaders into one room?

The challenge runs in both directions. Institutions spend considerable effort assembling returns, yet the data that arrives is often fragmented. Structured, continuously generated reporting serves effective supervision as much as it serves the institutions themselves.

THE SHIFT

Manual	Periodic	Explaining
›› *Connected*	›› *Continuous*	›› *Evidencing*

Two rooms. *One agenda.*

Finance leaders and technology leaders each get a programme built for their decisions, joined by one question: how do we replace manual effort with connected, evidence-ready systems?

8:30am Morning — **12:00 noon** Afternoon — **4:00pm** Close

MORNING · 8:30AM TO 12:00 NOON

I

Finance Executive Workshop

The End of Manual Finance

For CFOs, Finance Directors, Controllers, and financial reporting and sustainability leaders.

The voices *in the room.*

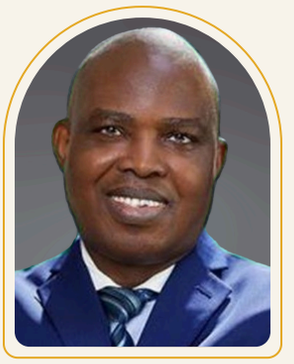

01

Olufemi Shobanjo

Chief Executive Officer, NGX Regulation Limited (NGX RegCo), a subsidiary of Nigerian Exchange Group Plc

Mr. Olufemi Shobanjo is the Chief Executive Officer of NGX Regulation Limited (NGX RegCo), a subsidiary of Nigerian Exchange Group Plc. He has over 18 years of experience in capital market regulation, compliance, corporate law, banking and financial services. Before his current role, he headed the Broker Dealer Regulation Department at the Nigerian Stock Exchange, overseeing more than 250 stockbroking firms. He also worked with HSBC Global Banking and Markets and Anglo Irish Bank Corporation in the UK. He holds an LLB from the University of Birmingham and an LLM in International Commercial Law from Cardiff Law School, alongside several professional memberships.

02

Titus E. Osawe

Former Coordinating Director, Corporate Governance and Inspections & Monitoring, Financial Reporting Council of Nigeria

Titus E. Osawe is a regulatory and corporate governance professional. He was the Financial Reporting Council of Nigeria's Most Senior Director and Coordinating Director of the Directorates of Corporate Governance and Inspections & Monitoring, and the FRC has announced his retirement after more than three decades of professional service, nearly two of them with the Council and its predecessor institutions. His work included public-sector corporate governance and initiatives promoting ethical leadership. His experience is particularly relevant to reporting integrity, institutional accountability and governance considerations that accompany organisational and technological change.

03

Dr. Iheanyi Anyahara

Former Coordinating Director, Financial Reporting Council of Nigeria; Chair, Adoption Readiness Working Group (ARWG) for Sustainability Reporting in Nigeria

Dr. Iheanyi Anyahara has over 30 years of industry experience, including more than 20 years in financial reporting, accounting standards and regulatory oversight. He has served as Coordinating Director and Head of Accounting Standards and Sustainability Reporting at the Financial Reporting Council of Nigeria, and as Acting Executive Secretary/CEO from March 2020 to May 2021. He has contributed to Nigeria\u2019s adoption of IFRS and public sector accounting standards, advises members of the International Public Sector Accounting Standards Board (IPSASB), and chairs Nigeria\u2019s Adoption Readiness Working Group for sustainability reporting. He is a Fellow of ICAN and a member of other professional bodies.

04

Kayode Adewuyi

Chief Financial Officer, First City Monument Bank (FCMB)

Kayode Adewuyi is a finance executive with over two decades of experience spanning financial management, audit, corporate finance, mergers and acquisitions, business integration and financial advisory. He previously led Mergers and Acquisitions at FCMB Group and served as Group Chief Financial Officer before becoming Chief Financial Officer of First City Monument Bank in August 2021. His experience includes involvement in major transactions within the group, combining financial discipline with strategic business growth. He holds a degree from Obafemi Awolowo University, an MBA from Lagos Business School and is a Fellow of the Institute of Chartered Accountants of Nigeria.

05

Iyinoluwa Aboyeji

Co-founder and Partner, Future Africa

Iyinoluwa Aboyeji is a Nigerian entrepreneur and investor. He co-founded Andela and Flutterwave, and is a Co-founder and Partner at Future Africa, a venture platform that provides capital, coaching and community to mission-driven innovators. He holds a degree in Legal Studies from the University of Waterloo and has been recognised as a World Economic Forum Young Global Leader and a Forbes 30 Under 30 honouree.

06

Tope Adeniyi

Managing Director / CEO, AXA Mansard Health Limited

Tope Adeniyi is the Managing Director and CEO of AXA Mansard Health Limited, Nigeria\u2019s leading health maintenance organisation (HMO). With over two decades of leadership across technology, insurance and healthcare, he previously led the deployment of Nigeria\u2019s landmark Insurance Industry Database (NIID). An alumnus of Lagos Business School, he bridges technical mastery with executive strategy to drive digital transformation and affordable healthcare delivery across emerging markets.

07

Dr. Niyi Ajao

Chief Executive Officer, Digital Finance Solutions; former Deputy Managing Director, NIBSS Plc

Niyi Ajao is Founder and CEO of Digital Finance Solutions Nigeria Limited, with about 30 years of experience in financial services spanning innovation, operations and electronic payments. He spent about 20 years at the Nigeria Inter-Bank Settlement System (NIBSS) Plc, rising to Executive Director and Deputy Managing Director (2019 to 2021), and was part of the team that developed the Bank Verification Number. He is an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria.

08

Lydia Ogba Esq.

Legal Executive, Layer3

Lydia Ogba Esq. is a legal practitioner with nearly a decade of professional experience spanning data protection, regulatory compliance and legal advisory. Her experience includes service in the Legal, Enforcement and Regulations Department of the Nigeria Data Protection Commission (NDPC). She is a Certified Data Protection Officer (CDPO), combining legal training with a practical understanding of data protection compliance, privacy governance and regulatory requirements.

Fifteen years of solving complex problems *with technology.*

Established in 2011 with a strong presence in IT GRC consulting and IT as a service, Opex Consulting Ltd helps African organisations apply technology, best-practice governance frameworks and delivery models to their most complex business problems.

WHAT WE DO

I Digital Transformation and Advisory Services

- Enterprise architecture (TOGAF) and information management
- Open banking, ISO 8583 and ISO 20022
- XBRL, ESG reporting and disclosure management
- Strategy and governance: ITIL, COBIT, ISO 37500

II Technology and Business Assurance

- Information security: ISO 27001, ISO 27032, ISO 27017, SOC 1 and SOC 2
- Data protection (GDPR, NDPR) and PCI-DSS
- Business continuity and IT service management: ISO 22301, ISO 20000
- Anti-money-laundering framework and VAPT

III Technology Solutions

- Cloud engineering: migration, optimisation, automation, hybrid cloud
- Data engineering and data science
- Web and mobile application development
- QA testing, product management and design

IV Learning Solutions

- Lead Auditor and implementer training and certification: ISO 27001, ISO 22301, ISO 20000
- Secure coding training

TRACK RECORD

ENTRUSTED BY THE REGULATOR

2020

till date

CBN IT standards compliance audits of banks, outsourced to Opex.

INSTITUTIONAL REACH

250+

financial institutions

We have served over 250 financial institutions.

INTEGRATION

13+

solution providers

System integration with over 13 solution providers across the globe.

WHY CHOOSE OPEX

Experienced team

Seasoned professionals in cybersecurity, data privacy, open banking, legal and regulatory domains.

Transformative leaders

Innovation through research and insight on digital transformation, data and AI, regulatory compliance and IT GRC.

Partnerships

Partners across countries delivering financial reporting, API management, cybersecurity, regtech and risk solutions.

IT standards

Licensed to implement IT standards such as GDPR, NDPR, ISO and AML, advising organisations across Africa.

WHO WE SERVE

Consulting for regulators, banks, fintechs, national microfinance banks, logistics, and oil and gas agencies, including FirstBank · UBA · GTBank · Access Bank · Zenith Bank · FCMB · Stanbic IBTC · Wema Bank · Sterling Bank · Standard Chartered · Optimus Bank · PremiumTrust Bank · FSDH Merchant Bank · Fidelity Bank · Polaris Bank · Ecobank · Quest Merchant Bank · Moniepoint · Paystack · Bamboo · Green Capital · SystemSpecs · SmartCash · e-Settlement · Flutterwave · XpressPay · Hydrogen · NPF Microfinance Bank · FairMoney · OPay · Letshego · Meristem · and more.

PARTNERS AND ACCREDITATIONS

OPEX CONSULTING

Unitellas®
Digitalizing Africa...

Secure.
Scale.
Innovate.

FIRST HYPERSCALE

EDGE CLOUD IN AFRICA

As positioned by Unitellas

Unitellas International is a Nigeria-based edge cloud and IT infrastructure provider, and distributes Zadara, a global leader in edge cloud services, in West Africa.

WHAT WE DELIVER

- EDGE CLOUD
- SOVEREIGN CLOUD
- AI INFRASTRUCTURE
- BACKUP & DISASTER RECOVERY
- STORAGE & COMPUTE
- KUBERNETES & CONTAINERS
- HYBRID CLOUD
- BUSINESS CONTINUITY

ENTERPRISE CLOUD WITHOUT COMPROMISE

- Pay-as-you-use
- No egress fees
- Enterprise-grade security
- High availability
- Local expertise

WHY LOCAL CLOUD ADOPTION

Data residency
Local infrastructure lets enterprises control, localise and secure physical access to their data.

Security and privacy
A local presence supports data sovereignty, security and privacy.

Applicable requirements
Confirm the rules that apply to your sector and data before choosing a deployment model.

SUPTECH FOR REGULATORS

The other half of *the compliance equation.*

Institutions have spent a decade upgrading how they comply. Supervision is the next frontier. The Bank for International Settlements describes suptech as the use of innovative technology by supervisory agencies to support supervision. Where regtech helps institutions comply, suptech helps supervisors oversee. They meet at the data.

Why now in Nigeria. The CBN's 2026 Baseline Standards for Automated AML Solutions call for automated solutions that detect and report suspicious activity in real time and support the automatic generation and submission of suspicious and currency transaction reports to the NFIU. Machine-ready reporting is becoming the norm.

Data collection

Supervisory reporting
Data management
Virtual assistance

Data analytics

Market surveillance
Misconduct analysis
Microprudential supervision
Macroprudential supervision

How data reaches the supervisor

1 Data input. The institution submits through templates or a portal.
2 Data pull. The supervisor retrieves defined data through APIs.
3 Real-time access. Selected data is available continuously, with agreed controls.

A PILOT ANY REGULATOR CAN RUN

1. **Choose one process**
   A single return or workflow where manual effort is high and the supervisory value is clear.
2. **Set the data standard**
   Agree fields, definitions and validation rules with the institutions taking part.
3. **Connect a small cohort**
   Three to five institutions of different sizes, by API or scheduled batch.
4. **Build checks and views**
   Automated validation and quality scoring, with a supervisory dashboard and explainable flags.
5. **Measure and decide**
   Compare turnaround, data quality and supervisory effort with the manual baseline, then decide whether to scale.

FOUR PRINCIPLES FOR TRUSTWORTHY SUPTECH

Explainable. Decisions are traceable to data and logic; the BIS flags lack of transparency in some analytics as a critical issue. **Quality at source.** Fix lineage and validation where data is created. **Proportionate.** Ask for the data a question needs. **Human judgment retained.** Technology surfaces; supervisors decide.

AN INVITATION TO REGULATORS

Let us co-design a pilot with you.
